

Myka Cool Sheet

Here are some quick pointers to help you get started.

The ZOOM button on the remote control is very important. It's the button in the bottom corner just above the blue button. When playing back a movie, it changes the screen mode (crop, full screen, fit to screen, actual size). After you press it, press the right arrow button on the round control to cycle through your options.

When putting files on Myka's hard disk, you need to place those files in the DOWNLOAD directory.

If you get lost, the RETURN button will often take you to the previous screen.

When playing a video, music or showing a picture, the STOP button will take you back to the navigation screen.

Once Myka is on your home network, you can find out its IP address by going to the Network tool.

Myka has an FTP server. Simply point your FTP client at Myka's IP address. Username is - **ftpuser** and the password is **1234**.

Myka's hard disk can be accessed directly from Windows. Open up a windows explorer window and enter \\IP.ADDRESS\share (ex. \\192.168.1.2\share). Username is **nmt** and the password is **1234**.

Myka has a telnet server. Telnet to Myka's IP address. No password is required.

There is a great disk file/directory manager that will be released very soon. In the mean time, you can use the above tools to manage your hard disk.

Myka's bittorrent manager can be accessed from any computer on your home network.. From a browser, go to <http://IP.ADDRESS:8077/> (ex. <http://192.168.1.103:8077/>). Username is **nmt** and the password is **1234**.
